## WORK EXPERIENCE

---

MicrometeUK

*Lead/Full stack developer*

*2022 - 2024*

- Led the development of an Automatic Number Plate Recognition (ANPR) as a service project, encompassing cloud infrastructure, image and video processing, API design and user interface development.
  - Achieved accuracy in number plate recognition
  - Automated vehicle identification and parking enforcement
  - Reduced cost by using cloud infrastructures.
- Designed a Python/Flask backend with Redis and a React frontend
  - Developed a new user interface with React, enhancing user experience and responsiveness.
  - Integrated the React frontend with Python/Flask backend using RESTful APIs.
- Developed Ansible roles to automate deployment across multiple environments.
  - Automated the deployment of the React frontend and Python/Flask backend using Ansible roles, enabling continuous integration and delivery
  - Reduced deployment time by automating the deployment process .”
  - Eliminated manual configuration errors and ensured consistent deployments across all environments using Ansible role
